Skills

Node js, typescript, java, express js, nest js, React js, Next js, type ORM, SQL, postgresql, mongo db, Prisma, tailwind css, swagger, open api.

Experience

Worked as a drop-servicer for a company/individual in the US for a duration of almost 2 years where I made an impact on several projects

November 2023 - PRESENT

Ivoyant, US – team lead - Fallouts manager

- Spearheaded a team of 4 frontend developers, driving collaboration and innovation
- Proactively identified and rectified critical bugs within the codebase, elevating product quality and user experience.
- Demonstrated leadership akin to a Product Owner (PO), ensuring project objectives were met with precision and efficiency.
- Optimized Java backend operations to expedite development cycles, enabling rapid progress towards project objectives.

February 2023 - October 2023

Lennar, US– Senior full stack developer - virtual lumber yard

- Leveraged expertise in React and Express technologies to create an internal tool to increase team productivity.
- Implemented robust deployment strategies, minimizing downtime and maximizing the agility of the development lifecycle.
- Elevated codebase integrity and coherence, fostering a culture of continuous improvement and collaboration.

June 2022 - february 2023

Ivoyant, US – full stack developer - data mapper

- Accelerated time-to-market for new features through efficient development practices and robust architecture.
- Ensured codebase excellence and consistency by actively participating in code reviews and PRs, driving adherence to coding standards and best practices.
