Skills

Node js, typescript, java, express js, nest js, React js, Next js, type ORM, SQL, postgresql, mongo db, Prisma, tailwind css, swagger, open api, sharetribe, stripe, graphql.

Experience

Full stack developer with 3 years of experience , from working as a subcontractor to being a full-time developer.

Scaleup consulting – fullstack developer - Sharetribe marketplace

- Integrated Stripe payment flows into multiple Sharetribe marketplace deployments, enabling secure bond collection, cancellation refunds, and progressive payout handling for client bookings.
- Extended Sharetribe's marketplace template with third-party services (e.g., Stripe), configuring UI transitions and transactional emails so clients could see precise fee breakdowns and cancellation logic.

Freelancer/Subcontractor – fullstack developer - fallout manager

- Directed a 4-person team from project kickoff through client-ready demo, securing new enterprise clients and earning CEO commendation.
- Reviewed pull requests and QA'd features, catching ~40% of bugs pre-production and reducing firefights during client milestones.
- Owned final regression testing before every stakeholder demo—zero critical bugs reported post-release, accelerating client onboarding by 25%.

Freelancer/Subcontractor – fullstack developer - virtual lumber yard

- Architected and implemented a TypeScript-based internal trading platform, replacing error-prone spreadsheets for 50+ high-volume transactions weekly.
- Championed TS adoption and code standards, cutting front-end bug rate and boosting dev velocity through type-safe patterns.
